<b>Office Action Summary</b>	<b>Application No.</b> 10/529,934	<b>Applicant(s)</b> LOUZIR ET AL.	
	<b>Examiner</b> Minh Trinh	<b>Art Unit</b> 3729	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/22/09 has been entered.

2. Claims 1 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

“the external surface of a conical block of synthetic foam” (claim 1, line 4) lacks proper antecedent basis.

“to create” (claim 1, line 6) not positive limitation, and it is unclear as to how the a single mold can be used to create a number of structural elements, i.e., horn, polarizer, etc., for the above structure to be made the mold have to have a pattern which corresponding to the of the claimed “microwave antenna structure including corrugated section, horn section and polarizer section, etc.”.

It is not clear as to what being referring as “thermoforming by using a single mold to create a horn, a circular polarizer and an impedance adapter,” etc., (claim 1, lines 4-5). Note there is at least two mold parts 4 as shown in Fig. 2.

“Also, whether or not the “thermoformed block of foam” (claim 1, line 8) is as same as “the conical block of synthetic foam” (as in line 4 of claim 1) ?

Further, claim 1 appears to be incomplete since the claim directed to a process for making microwave corrugated antenna, however , there is no antenna found at the end of the process.

Regarding claim 1. It is noted that no art rejections have been applied to claim 1, since there are a great deal of confusion and uncertainty as to the proper interpretation of the limitations of the above claims. Therefore, it would not be proper to reject such claims on the basis of prior art. See MPEP 2173.06.
